OFFICIAL NOTICE OF 1940 ACREAGE ALLOTMENTS, BASES,  
DIVERSION GOALS, NORMAL YIELDS, AND PRODUCTIVITY INDEX

The following allotments, bases, diversion goals, normal yields, and productivity index are established for the purposes of the 1940 Boone County Agricultural Conservation Program and, where applicable, for the purposes of the farm marketing quota, loan, and parity payment provisions of the Agricultural Adjustment Act of 1938, as amended.

(a)	Acreage Allotments (b)	Base Acreages (c)	Diversion Goals (d)	Yield or Productivity Index (e)
Total soil-depleting				%
Corn				bu.
Wheat				bu.
Commercial Vegetables		XXXX	XXXX	XXXXX

No appeals will be considered under the Agricultural Conservation Program for changes in 1940 wheat allotments or yields, of which farmers have been previously notified, because the appeal period for them has passed.

Except as provided in the above paragraph, any owner or tenant who has an interest in the 1940 crops on this farm, believes he has just grounds, and can offer facts to substantiate his claim, may file an appeal for reconsideration of the allotments, bases, goals, yields, or productivity index. The appeal and facts constituting a basis for such reconsideration must be submitted in writing to the address shown below and must be postmarked or delivered to the office within 15 days after the date shown on this notice.

Performance on this farm will be determined on the basis of the above allotments and goals unless there is a change in the size of the farm which is officially approved by the county committee before May 1, 1940. If any changes are contemplated, the operator or owner should review his plans with the county committee before planting time, so that the county committee may advise him as to the effect of his proposed operations on performance and payment under the 1940 Farm Program.
